Bilingual environment

PROGRAM OBJECTIVE

Logistics is the universal thread or “pipeline” that plans and coordinates the delivery of products and services to customers all over the world. It ensures an effective and efficient flow of materials and information from the time a need arises until it is satisfied and beyond.

Logistics is involved every time you purchase a product, whether it’s food, medicine, or clothing. It doesn’t matter how you shop, whether at a store, by mail order, through direct sales, or via the Internet, you are being served by the logistics pipeline. The items you purchase have been transported from manufacturers near and far to get to you and logistics professionals have managed each of these journeys.

The goal of this program is to prepare students for employment in the domain of transportation and logistics. Designed for adults who do not have any prior academic training in the areas of transportation and logistics, the intention of this program is to enable them to begin successful careers and provide a sound foundation for further education and career development in this economic sector.

Graduates of this Program would be prepared for employment in positions such as Logistics Coordinator, Fleet Manager, Logistics Dispatcher, and Transport and Export Technician.

SCHEDULE: Monday to Friday from 9:00 a.m. to 4:00 p.m. (25 hours/week)

This training program is open to all candidates who meet the admission requirements below.

ADMISSION REQUIREMENTS

Candidates must have a Quebec Diploma of Secondary Studies or a High School Leaving Certificate or have received instruction deemed sufficient by the College. Candidates must be functionally bilingual (French and English), particularly in their oral communication skills. Candidates are required to take the following entrance exams: Mathematics, English and French (oral and written). Prospective candidates will be asked to submit a curriculum vitae (CV) and may be interviewed prior to admission to the Program to verify their qualifications. Potential candidates may be required to take an appropriate remedial course(s).

Please see admission criteria concerning programs on our website.
